WORK EXPERIENCE

Shuttlers   **Oniru, Lagos State**
Frontend Developer   *August 2023 - Present*

- Collaborated with a diverse team of designers, backend developers, and QA engineers to deliver frontend solutions, resulting in a 15% improvement in overall project efficiency.
- Spearheaded and implemented UI enhancement, resulting in a 20% reduction in page load times.
- Contributed to code reviews with a focus on identifying and addressing performance bottlenecks, leading to a 30% improvement in code quality.

Capriquota   **Abeokuta, Ogun State**
Frontend Developer   *January 2023 - August 2023*

- Deployed server-side rendering (SSR) using Next.js to improve page load times by 10% and SEO performance.
- Partnered with senior developers in reducing development time by 25%, making use of technologies like React.Js
- Coordinated with the product design team to design and implement an intuitive user interface and achieved a 20% increase in user engagement

Dev Career   **Ibadan, Oyo State**
Frontend Developer Intern   *September 2022 - December 2022*

- Worked jointly with senior developers to assist in developing responsive websites using HTML, CSS, and JavaScript.
- Assisted in developing and maintaining front-end components of web applications using modern frameworks like React.
- Collaborated with senior developers to develop responsive web applications that were optimised for different screen sizes.

PERSONAL PROJECTS

Switch Online   **GitHub**
Sole Developer   *NextJS*

- Leveraged NextJS to streamline server-side rendering, enhancing page loading speed and SEO performance for Switch Online's landing pages.
- Utilized TypeScript to enforce type safety and improve code maintainability, ensuring a robust and scalable codebase for Switch Online's digital projects.
- Integrated TailwindCSS for rapid UI development and seamlessly incorporated GSAP for immersive animation effects, enhancing user engagement and brand storytelling on Switch Online's landing pages.

Dashboard Clone   **GitHub**
Sole Developer   *NextJS*

- This project is a clone of the Lendsqr Admin Console.
- Designed to showcase proficiency in frontend development.

- The design and functionality closely resemble the original Lendsqr Admin Console, providing a seamless user experience.

[Portfolio Website](#)   **[GitHub](#)**
Sole Developer   *ReactJS*

- Developed a personal portfolio website to showcase my front-end development skills.
- Applied a clean and modern UI design, using ReactJs and Tailwind CSS & FramerMotion.
- Employed responsive design principles to ensure optimal viewing experience across devices.

[Awaskill](#)   **[GitHub](#)**
Lead Developer   *NextJS*

- Designed to help tech enthusiasts make a well-informed decision on which tech skill to acquire
- Coordinated with other developers, while also syncing with a designer to ensure great UX and follow basic design principles
- Improved SEO performance and page load time by using NextJS.
